

ATS HIPAA Statement

Keffer Development Services certifies that to the best of our ability and understanding, our (ATS) Athletic Trainer System[®] (Version 3.9 or better) has been designed to meet or exceed the guidelines set forth by the Health Insurance Portability and Accountability Act of 1996 (HIPAA).

Keffer Development Services, is not responsible for nor will assume any liability for direct or indirect cause by a Keffer Development Services, business partner, client, or otherwise covered entity's understanding and timeliness of compliance, compliance deficiency or any compliance limitation.

ATS Program Features

The following HIPAA-related features are available in **ATS**:

- **User Accounts** - are required and consist of a user name and strong password to gain entry to the application. Each account must be configured with access to organizations and teams. Access to different modules may be restricted by level of access.
- **User Logins** - are recorded each time a user logs in. Each athlete record viewed, added, updated or deleted is recorded.
- **SSL Encryption** - The ATS Core uses the SSL encryption available via Microsoft's Visual Studio 2005 when sending & receiving data over the internet.
- **Web Portal Encryption** – When hosted by us, the ATS Web Portal and ATS Smartphone make use of 128-bit encryption.

Where to Find More Information about HIPAA
